The World's First 300" Acrylic Screen System

The Next Generation of Projection Screens
BLUE OCEAN enhances any rear projector system’s capability, but its bold value is its complete utilization of the advancements in high definition video resolution and rear projector technology. It fully maximizes the projector’s capability delivering back the projected light forcibly and beautiflly to the viewer. Rear Screen projection video & graphic presentations will never be the same.

A major break-through in creating absolute fidelity in digital signal, light & screen.
